OUR MOTTO

तमसो मा ज्योतिर्गमय

Mission

All-round development of students by providing quality education that can empower students to become confident, competent and responsible global citizens, who value education as a lifelong process.

The open book in the emblem symbolizes an open mind to adapt to newer ideas. The seven blue stars represent the seven continents, signifying the spread of universal education.

The olive branches stand for peace, prosperity and global partnership through education. The five red stars symbolize the need to keep the five organs of perception open and wide awake.

Round Square

Cross Cultural Collaboration from a Global outlook

We recognize that a successful education has many different strands. Our association with Round Square (a network of 215 schools from 55 countries across five continents) in the year 2017 is a positive progressive initiative and has brought many multicultural and multilingual opportunities for students for their all-around personality development. Round Square works around its philosophy that student education is based on much more than what occurs in the classroom. Association with Round Square has allowed us to connect with schools not at the national level but internationally and given opportunity for our students to travel to conferences and service projects to share ideas and programs with like-minded counterparts throughout the world.
